What is EuroDIG?

Launched in 2008, EuroDIG, the European Dialogue on Internet Governance, is a unique annual event that brings together Internet stakeholders from throughout Europe (and beyond), and from across the spectrum of government, industry, civil society, academia and the technical community.

Stakeholders and participants work over the course of each year to develop, in a bottom-up fashion, a dynamic agenda that explores the pressing issues surrounding how we develop, use, regulate and govern the Internet. EuroDIG participants come away with broader, more informed perspectives on these issues and new partners in responding to the challenges of the information society.

Get involved!

Every year EuroDIG takes place in another European country, bringing in new people. The local community always plays a big role in the planning process.

EuroDIG is not a usual conference organized top-down by a small committee. It is a platform and process where **YOU** set the agenda and shape the discussion. **YOU** are invited to participate in the call for issues! **YOU** are invited to the public planning meeting and review a draft programme! **YOU** are welcome to join the Org Teams and take responsibility for a

session! **YOU** can take the floor during the conference and make your voice heard!

EuroDIG 2025 will be hosted by the Council of Europe in cooperation with the Luxembourg Presidency of the Committee of Ministers of the Council of Europe.

What are the results of EuroDIG?

EuroDIG is a decision shaping, not a decision-making body and therefore the place to start and to facilitate a discussion but not to finalise it. Results are influencing public policy across the continent about the governance of the Internet.

After each annual event, “Messages” from all sessions are compiled and submitted to the global Internet Governance Forum in order to share the European perspective.

YOUthDIG

The Youth Dialogue on Internet Governance (YOUthDIG) is a yearly pre-event to EuroDIG aimed to foster active youth participation. About 30 young people from the pan-European region with a strong interest in Internet governance, digital policy and cooperation are working together to draft and advocate for the youth messages.
